

## **Containment Solutions for Freeze-Drying / GORE™ LYOGUARD® Freeze-Drying Products**

### **ABSTRACT:**

This webinar will introduce the integration of microfiltration technology and single-use disposables, as a means to contain and protect product before, during and after freeze-drying. The presentation is aimed at individuals that are interested in understanding the challenges related to containing and protecting product throughout the lyophilization process and wishing to explore alternative technologies for freeze-drying.

Key topics will include: overview to open and closed freeze-drying systems, introduction to single-use microfiltration technologies, discussions related to air and liquid filtration and a case study.
