

How to Select a Freeze Dryer

ABSTRACT:

This webinar will address the technical challenges of selecting the correct Lyophilizer for a common variety of applications. While some of the topics discussed are applicable to all freeze dryers, this particular discussion will focus on freeze drying vials or bulk products in a unit with shelf temperature control.

Discussion Points

- Condenser capacity (Ice capacity)
- Shelf area selection :: vial or bulk calculations
- Stoppering vs. bulk
- Solvents and how they impact equipment selection
- Sterility, Decontamination and cleaning
- Lyophilization process control, recording and optimization
- Validation and testing options
